Objective

Aspiring software developer with a strong foundation in programming and problem-solving, seeking opportunities to contribute to impactful projects and continuously grow in the tech industry.

Education

Nitte Meenakshi Institute of Technology Bengaluru, Karnataka, India

Bachelor of Engineering – Information Science and Engineering (CGPA: 8.74/10) Dec 2022 – Jul 2026

Royal PU College Chintamani, Karnataka

Class 10: 96% (2020) — Class 12: 96.3% (2022)

Projects

AutoPrice ML – Predictive Car Price Analysis *Python, Pandas, NumPy, Scikit-learn*

- Collected and cleaned historical car data including brand, model, year, mileage, and vehicle features.
- Built Linear Regression models to estimate resale prices and improve prediction accuracy.
- Performed data preprocessing, feature engineering, model training, and evaluation using Scikit-learn.
- Generated real-time price predictions to assist users in making informed buying and selling decisions.

AI Interview Preparation Platform *React, Spring Boot, MySQL, AI Integration*

- Developed a full-stack platform that enables users to practice technical interviews in domains such as Java, DSA, DBMS, and Operating Systems.
- Implemented secure user authentication and profile management using Spring Boot and MySQL.
- Integrated AI-generated interview questions to simulate real interview experiences.
- Built an automated evaluation system that provides AI-based feedback and scoring on user responses.
- Designed a performance analytics dashboard to track interview history, scores, and improvement trends.
- Added resume upload functionality and real-time interview assessment features to enhance interview preparation.

Internship Experience

Aqmenz Automation Pvt. Ltd. *Intern Mar 2023 – Apr 2023*

- Gained exposure to real-world software development practices and industrial workflows.
- Worked on guided technical tasks that strengthened problem-solving and implementation skills.
- Improved adaptability, teamwork, and understanding of practical software solutions.

Technical Skills

Programming Languages: Java

Frontend: HTML, CSS, React.js

Backend: Spring Boot, REST APIs,MySQL

CS Fundamentals: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

Tools: GitHub, VS Code, Postman

Courses and Certifications

- Operating Systems – Coursera
- Database Management Systems – Springboard
- Java Programming for Beginners – Crio.Do
